

The Flamma Group Expands Globally Reinforcing Its Commitment to Growth

Chignolo D'Isola, Bergamo, Italy – June 23, 2025 – The **Flamma Group** (“Flamma”) is a global, fully integrated company producing and commercializing small molecule Active Pharmaceutical Ingredients (APIs) for the life science industry. As a preeminent Contract Development and Manufacturing Organization (CDMO) of New Chemical Entities (NCEs) and late stage intermediates for the Innovator Companies, Flamma celebrated the Grand Opening of its new state-of-the-art cGMP plant in Dalian, China. This milestone aligns with the company’s broader strategy to invest significantly across its global network which included its continued expansion within Italy.

“Flamma has been present in the Chinese market for over 30 years. Initially, we focused on sourcing key raw materials directly to secure the supply chain. We then established our own R&D laboratory in China which ultimately led to the formation of Flamma Honkai in Dalian in 2012. We are extremely proud of what we’ve accomplished over the past 17 years of operations in Dalian. With Honkai being a fully owned and run subsidiary, we’ve been able to combine Flamma’s core values and expertise with the efficiency of the Honkai management team, leading to a 30-fold increase in turnover, Chinese FDA approval, and significant market growth,” says Dr. GianPaolo Negrisoni, President and CEO.

Founded 75 years ago in Bergamo, Flamma continues to represent the excellence of Italian manufacturing and innovation. “As we inaugurate this major site in Dalian, we also reaffirm our roots,” states GianMarco Negrisoni, Executive Director - Corporate Development. “This global expansion complements the substantial investments we are making in Italy, including significant facility upgrades, capacity increases, and continued recruitment of high caliber talent. Flamma plans to reinvest \$200 million worldwide over the next five years to grow our manufacturing capacity, technology and capabilities, reinforcing the synergy between its Italian heritage and global outlook.”

About Flamma:

Founded in 1950, Flamma is a global, fully integrated CDMO specializing in small molecule development and manufacturing. With facilities in Italy, China, and the USA, we deliver **Chemistry with a Human Touch**—combining scientific precision, strategic thinking, and a deeply collaborative approach.
