

The Flamma Group Receives Funding from Regione Lombardia in 2026

Chignolo D'Isola, Bergamo, Italy – May 5, 2026 – The **Flamma Group** (“Flamma”) is a global, fully integrated company producing and commercializing small molecule Active Pharmaceutical Ingredients (APIs) for the life science industry. As a preeminent Contract Development and Manufacturing Organization (CDMO) of New Chemical Entities (NCEs) and late-stage intermediates for the Innovator Companies, Flamma is proud to announce that it has received important funding from Regione Lombardia.

GREEN-TECH: Application of innovative, low-environmental-impact technologies for the development and optimization of sustainable chemical processes.

Funded by the regional Program under the European Regional Development Fund 2021/2027 of Regione Lombardia
ERDF ROP 2021-2027

Action: “Support for the implementation of complex research, development, and innovation projects”

Call: “COLLABORA & INNOVA”

Beneficiary: FLAMMA S.P.A.

Description: The project involves the use of process parameters already applied at plant scale and/or still under R&D development as inputs for the creation of a database. This pool of data will be used to develop models for process optimization and for out-of-trend and out-of-specification investigations. To achieve this goal, the application of Artificial Intelligence (AI) and automation will be essential. Process optimization will be specifically aimed at improving at least one of the following targets: yield, product purity, cycle time, production cost, or the number of failed batches.

Total amount: €552.505,97

Granted aid: €221.002,39
